6. Brief Description of Module (purpose, principal aims and objectives)

Leaders in education are striving to meet the demands of the education sector whilst continuously being challenged by external macro factors such as funding, regulatory requirements and staffing. This module is designed to introduce learners to the complexities of leading and managing in educational settings today, whilst exploring the transferable skills required of a leader which can be applied at all levels. This will enable learners to understand the strategic aims of a setting that they wish to embark a career within; and develop an appreciation of the contextual challenges that senior leadership teams face. In doing so, learners will be able to demonstrate a strong grasp of educational issues and how they can be resolved from a leadership perspective. This will prove enabling and assist career development.

The first part of the module will focus upon challenges facing contemporary education leaders which are representative of the workplace environment. Learners will examine how these factors influence strategy, as well as the behaviour of individuals and groups within a setting. The second part of the module will enable learners to evaluate a range of leadership and management principles, competencies and skills to address the challenges that have been identified. Furthermore, learners will examine the impact of their recommendations by focusing upon the setting's strategic aims; and the behaviour of individuals and groups within the setting.

7. Learning Outcomes - On successful completion of this module a student will be able to:
